

Consultations and Pre-treatment Tests		
Exploratory Consultation	Free 20-minute phone or video call to ask questions about your fertility journey and ensure I'm the right doctor for you	£0
Initial Consultation	60-minute in-person or virtual consultation, includes follow-up consultation	£200
Ultrasound Scan	Antral follicle count and baseline	£150
Anti-Mullerian Hormone (AMH)	Ovarian reserve blood test	£100
Semen Analysis	Semen analysis with MAR test	£165
Counselling		£80
Early Pregnancy Scan	Clinical pregnancy scan - Early viability scan 6-8 weeks	£225
HyCoSy	Ultrasound technique to evaluate the tubal patency	£400
Saline Infusion Scan Hysterosonogram (3D scan)	Ultrasound technique with saline contrast to evaluate the uterine cavity and lining	£400
Virology Screening Blood Tests (per partner)	<p>HIV, Hepatitis B surface antigen (HBsAg) , Hepatitis B core antibody (Anti-HBc), Hepatitis C</p> <p>Every patient undergoing IVF, ICSI, or IUI needs these blood tests</p> <p>These tests must be within 3 months of a first treatment cycle (ie egg collection or IUI procedure) and then repeated every 2 years</p> <p>*Screening tests may be performed with your GP; however, it is a regulatory requirement that pathology tests must be carried out by a laboratory with ISO 15189 accreditation. We cannot accept any infectious disease screening results that do not include the laboratory's details and confirmation that the laboratory is ISO 15189 accredited</p>	£190
Rubella	Female patients must be tested to ensure immunity to rubella before treatment. If you are pregnant and catch rubella, it can cause serious damage to the unborn child.	£45
Chlamydia and Gonorrhoea (per partner)	All patients are tested for Chlamydia and Gonorrhoea to allow our doctor to treat any infection, prevent further spread and assess any damage which may have been caused to their fertility	£65

Cycle monitoring and IUI treatments		
Ovulation induction/Cycle Monitoring	<p>Cycle monitoring costs include clinical planning and support monitoring ultrasound</p> <p>Cycle monitoring costs do not include monitoring blood tests and medications if needed.</p>	£650
Monitoring blood tests if required	Oestradiol	£50
	Luteinizing hormone	£50
	Progesterone	£50
Intrauterine Insemination (IUI)		
Intrauterine Insemination (IUI) 1 cycle	<p>Included:</p> <ul style="list-style-type: none"> • Clinical planning & support during the treatment cycle • Monitoring ultrasound scans • Sperm Preparation • Insemination • Patient/Clinical Intelligence 	£1300
	<p>Not Included:</p> <ul style="list-style-type: none"> • Pre-treatment screening blood tests • Monitoring blood tests • Medications (£50 - £1000) • Pregnancy scan or follow-up consultation 	Charged Separately
Intrauterine Insemination (IUI) with Donor Sperm	<p>Included:</p> <ul style="list-style-type: none"> • Clinical planning & support during the treatment cycle • Monitoring ultrasound scans • Donor Sperm Preparation • Insemination • Patient/Clinical Intelligence • HFEA Fee - £ 40 	£1300

	<p>Not Included:</p> <ul style="list-style-type: none"> • Pre-treatment screening blood tests • Monitoring blood tests • Medications (£50 - £500) • Pregnancy scan or follow-up consultation • Donor sperm sample costs (Sperm Bank fee) 	Charged Separately
--	---	---------------------------

Cancellation and Refund policy for the IUI cycles:

Patients are eligible for a refund of £1010, if the treatment cycle is abandoned during stimulation and before the insemination procedure is scheduled.

Patients will be charged for blood tests that have been performed and any medications that have been dispensed up to the date of cycle cancellation, as these are not refundable under any circumstances.

Intrauterine Insemination (IUI) 3 cycle	<p>Multicycle IUI treatments contain and exclude the same items from individual treatment cycle options.</p> <p>Multicycle Intrauterine Insemination (IUI) treatment starts from the beginning of the 1st cycle of the package. A previous IUI cycle attempt cannot be joined as a part of the package.</p> <p>IUI multicycle packages must be paid in full before the first cycle is started and completed within 9 months.</p>	£3000
--	--	--------------

Cancellation and Refund policy for the IUI multicycle package:

If a cycle is abandoned prior to insemination (for a clinical reason), this will be omitted from the 3-cycle package, however the patient will be charged for any blood tests and medications dispensed relating to the cancelled cycle.

There is no refund offered if a live birth occurs after any of the 3 cycles or if the 3 cycles are completed without live birth.

If any of the 3 cycles are not completed within a 9-month period, no refund is available.

If you wish to convert to IVF/ICSI or stop treatment, prior to the completion of the 3 cycles, you will be charged for the IUI cycles undertaken at the standard price list and the remainder of the multicycle fees paid can be deducted from the IVF/ICSI cycle or refunded.

IVF/ICSI Treatment Cycle

<p>IVF/ICSI CYCLE</p>	<p>Included:</p> <ul style="list-style-type: none"> • Clinical planning & support during the IVF treatment cycle. • Nurse consultation. • Monitoring ultrasound scans, egg collection procedure & anaesthetic charges. • Sperm preparation. • ICSI with AI sperm selection.* • Fertilisation and embryo culture. • Extended Blastocyst Culture (Day 5)** • Embryoscope*** • AI Embryo Assessment and Patient Embryo Viewer. • Fresh embryo transfer or embryo freeze if no transfer goes ahead (excludes cryostorage fee). • HFEA fee • Pregnancy scan, or a follow up consultation for cycles which do not result in a clinical pregnancy. 	<p>£5910</p>
	<p>Not Included:</p> <ul style="list-style-type: none"> • Pre-treatment screening blood tests. • Monitoring blood tests. • Medications (£500 - £2500) • Embryo freezing of extra embryos (£400 - up to 4 straws) and storage. 	<p>Charged Separately</p>

*We charge all patients the ICSI cost in advance to have the possibility to do a rescue ICSI, but in case the procedure does not place, these costs are refunded (see cancellation policy)

**We routinely plan to culture all embryos to day 5. This fee is charged in addition to the IVF cycle cost, but will be refunded if culture beyond day 3 does not take place.

***Incubation in the non-interrupted time-lapse imaging incubator is our preference for monitoring embryo development. Please see the treatment 'add-ons' guide for more information.

Cancellation and Refund policy for the IVF/ICSI cycles:

If the cycle is abandoned before the trigger injection has been made, the patient will be eligible for a refund of £4870.

If the cycle is abandoned because of premature ovulation on the day of egg collection, or if no eggs are collected, or no mature eggs are found, then the patient will be eligible for a partial refund of £700, which includes: fees for the extended blastocyst culture, AI embryo assessment, patient embryo viewer, fresh embryo transfer, HFEA fee - further £750 ICSI refund if it was prepaid.

If there is a failure at the fertilisation/cleavage stages, then the patient will be eligible for a partial refund, which includes fees for the extended blastocyst culture, fresh embryo transfer, HFEA fee = £450

If ICSI is not performed, then the patient will be eligible for a refund of £750.

Any blood tests performed and medications dispensed during the treatment cycle are not refundable under any circumstances.

Egg + Embryo batching Cycle

<p>Egg + Embryo batching (Low ORT): 3 Cycle Package</p>	<p>Included:</p> <ul style="list-style-type: none"> • Clinical planning & support for each IVF treatment cycle • Nurse consultation • Monitoring Ultrasound scans (3 cycles) • Patient/Clinician intelligence • Egg collection procedure and sedation (3 cycles) • Egg freezing (2 cycles) • Egg thawing at the end of the third cycle • Sperm preparation • ICSI with AI sperm selection • Fertilisation and embryo culture • Extended blastocyst culture (day 5*) • Embryoscope** 	<p>£13120</p>
--	--	----------------------

	<ul style="list-style-type: none"> · AI Embryo Assessment and Patient Embryo Viewers · Fresh Embryo Transfer · HFEA fee · Pregnancy scan or a follow up consultation for cycles which do not result in a clinical pregnancy 	
	<p>IVF cycle costs do not include:</p> <ul style="list-style-type: none"> · Pre-treatment screening blood tests. · Monitoring blood tests. · Medications (£500 - £2500 per cycle) · Embryo freezing of extra embryos (£400 - up to 4 straws) and storage. 	<p>Charged Separately</p>

The patient would be expected to pay in full for the 3 cycle package in advance before the first cycle has started. The cycles need to be completed within a 12 month period.

This package includes egg freezing for 2 cycles + egg thaw + fertilisation + embryo transfer at the third cycle.

* We routinely plan to culture all embryos to day 5. This fee is charged each IVF cycle but will be refunded if culture beyond day 3 does not take place.

**Incubation in the non-interrupted time-lapse imaging incubator (embryoscope) is our mandatory approach for monitoring embryo development. This fee is charged each IVF cycle but will be refunded if fertilisation and embryo cultivation does not take place.

Cancellation and Refund policy for the Egg + Embryo batching 3 Cycle Package:

If a cycle is abandoned prior to the egg collection procedure, this will be omitted from the package fee, however the patient will be charged for any diagnostic procedures, blood tests and medications dispensed relating to the cancelled cycle.

There is no refund offered in the event of no eggs being collected, fertilisation failure or nothing suitable for freezing. The Egg + Embryo batching 3 Cycle Package is complete when all egg collections have been performed.

There is no refund offered if The Egg + Embryo batching 3 Cycle Package is completed without a live birth.

If any of the 3 cycles are not completed within a 12-month period, no refund is available.

Elective Frozen IVF/ICSI Cycle

Elective Frozen IVF/ICSI Cycle (e.g risk of OHSS, need for PGT-a)

Included:

- Clinical planning & support for each IVF treatment cycle
- Nurse consultation
- Monitoring Ultrasound scans
- Patient/Clinician intelligence
- Egg collection procedure and sedation
- Sperm preparation
- ICSI with AI sperm selection*
- Fertilisation and embryo culture
- Extended blastocyst culture (Day 5)**
- Embryoscope***
- AI Embryo Assessment and Patient Embryo Viewer

£5910

Not included:

- Pre-treatment screening blood tests.
- Monitoring blood tests.
- Medications (£500 - £2500)
- Embryo storage fee (£400 - up to 4 straws)

Charged Separately

* We charge all patients the ICSI cost in advance to have the possibility to do rescue ICSI, but in case the procedure does not take place, these costs are refunded to the patient (see cancellation policy).

** We routinely plan to culture all embryos to day 5. This fee is charged for each IVF cycle but will be refunded if culture beyond day 3 does not take place (see cancellation policy).

*** Incubation in the non-interrupted time-lapse imaging incubator (embryoscope) is our mandatory approach for monitoring embryo development. This fee is charged for each IVF cycle but will be refunded if fertilisation and embryo cultivation does not take place (see cancellation policy).

Cancellation and Refund policy for the Elective Frozen IVF/ICSI cycle:

If the cycle is abandoned before the trigger injection has been made, the patient will be eligible for the refund of £ 4 870.

If the cycle is abandoned because of premature ovulation on the day of egg collection or if no eggs are collected or no mature eggs are found, then the patient will be eligible for a partial refund, which includes fees for the extended blastocyst culture, AI embryo assessment, patient embryo viewer, embryo freezing - £800 + £750 (ICSI if it was prepaid).

If there is a failure on the fertilisation/cleavage stages, then the patient will be eligible for a partial refund, which includes fees for the extended blastocyst culture, embryo freezing - £550.

If ICSI is not performed, then the patient will be eligible for a £750 refund.

Any blood tests performed, and medications dispensed during the treatment cycle are not refundable under any circumstances.

DUOSTIM

<p>DUOSTIM (2 Ovarian stimulation in 1 cycle)</p>	<p>Included:</p> <ul style="list-style-type: none"> • Clinical planning & support during the IVF treatment cycle • Nurse consultation • Monitoring Ultrasound scans • Patient/Clinician intelligence • Egg collection procedure and sedation (2 times in 1 cycle) • Egg freezing (after first egg retrieval) • Egg thawing after second egg retrieval • Sperm preparation • ICSI with AI sperm selection* 	<p>£8440</p>
--	---	---------------------

	<ul style="list-style-type: none"> • Fertilisation and embryo culture • Extended blastocyst culture (Day 5)** • Embryoscope*** • AI Embryo Assessment and Patient Embryo Viewer • Embryo freezing (up to 4 straws) 	
	<p>Not included:</p> <ul style="list-style-type: none"> • Pre-treatment screening blood tests. • Monitoring blood tests. • Medications (£500 - £2500 per 1 stimulation) • Embryo storage fee 	Charged Separately

Ovarian stimulation is carried out 2 times, during the follicular and luteal phases of the same cycle.

This package includes 2 egg collections + egg freezing after the 1st egg retrieval + egg thawing after the 2nd egg retrieval + fertilisation of thawed and fresh eggs + embryo freezing.

* We charge all patients the ICSI cost in advance to have the possibility to do rescue ICSI, but in case the procedure does not take place, these costs are refunded to the patient (see cancellation policy).

** We routinely plan to culture all embryos to day 5. This fee is charged each IVF cycle but will be refunded if culture beyond day 3 does not take place.

***Incubation in the non-interrupted time-lapse imaging incubator (embryoscope) is our mandatory approach for monitoring embryo development. This fee is charged each IVF cycle but will be refunded if fertilisation and embryo cultivation does not take place.

Cancellation policy and Refund policy for the DUOSTIM Package:

The refund amount depends on the stage at which treatment is interrupted and is discussed with each patient individually.

There is no refund offered in the event of no eggs being collected, fertilisation failure or nothing suitable for freezing.

There is no refund offered if the DUOSTIM program is completed without live birth.

Any diagnostic procedures, scans, blood tests performed, and medications dispensed during the treatment cycle are not refundable under any circumstances.

Egg Freezing Cycles

Egg Freezing Cycle	<p>Included:</p> <ul style="list-style-type: none"> • Clinical planning & support during the treatment cycle • Nurse consultation • Monitoring Ultrasound scans • Patient/Clinician intelligence • Egg collection procedure and sedation • Egg freezing (up to 4 straws) • AI Egg Assessment and Patient Egg Viewer 	£3340
	<p>Not included:</p> <ul style="list-style-type: none"> • Pre-treatment screening blood tests. • Monitoring blood tests. • Medications (£500 - £2500 per cycle) • Cryo storage fee. 	Charged Separately
<p>Cancellation and Refund policy for the Egg Freezing cycles:</p> <p>If the cycle is abandoned before the trigger injection has been made, the patient will be eligible for the refund of £3 050.</p> <p>If the cycle is abandoned because of premature ovulation on the day of egg collection or if no eggs are collected or no mature eggs are found for freezing, then the patient will be eligible for a partial refund, which includes AI egg assessment and patient egg viewer, egg freezing - £550.</p> <p>Any diagnostic procedures, blood tests performed, and medications dispensed during the treatment cycle are not refundable under any circumstances.</p>		
Multicycle Egg Freezing Packages (egg batching)	2 Cycles Package	£5540
	3 Cycles Package	£7840
	<p>Multicycle Egg Freezing Packages contain and exclude the same items as the individual treatment cycle option.</p> <p>Multicycle Egg Freezing starts from the beginning of the 1st cycle of the package. A previous Egg freezing cycle attempt cannot be joined as a part of the package.</p> <p>Multicycle Egg Freezing Packages must be paid in full before the first cycle is started and completed within 6-months period for the 2 cycles package and within 9-month period for the 3 cycles package.</p>	

Cancellation and Refund policy for the Multicycle Egg Freezing package:

If the cycle is abandoned prior to the egg collection procedure, this will be omitted from the multicycle package, however, the patient will be charged for any diagnostic procedures, blood tests and medications dispensed relating to the cancelled cycle.

There is no refund offered in the event of no eggs being collected or the eggs collected are not suitable for freezing. The multicycle Egg Freezing package is complete when all egg collections have been performed.

If any of the 2 or 3 cycles are not completed within the time limits indicated above, no refund is available.

Frozen Embryo Transfer

Frozen Embryo Transfer	Included: <ul style="list-style-type: none">• Clinical planning & support during the frozen embryo transfer treatment cycle• Nurse consultation• Monitoring Ultrasound scans• Patient/Clinician intelligence• Embryoscope• Frozen/Thawed embryo transfer• HFEA fee• Pregnancy scan, or a follow up consultation for cycles which do not result in a clinical pregnancy	£2000
	Not Included: <ul style="list-style-type: none">• Pre-treatment screening blood tests• Monitoring blood tests• Medications (£50 - £1500 per cycle)	Charged Separately

Cancellation and Refund policy for the Frozen Embryo Transfer:

If there is a failure on the thaw stage and there are no further embryos available for transfer, patient will be eligible for HFEA fee refund - £100.

Egg Thaw and Embryo Transfer

Egg Thaw and Embryo Transfer	<p>Included:</p> <ul style="list-style-type: none"> • Clinical planning & support during the frozen embryo transfer treatment cycle • Nurse consultation • Monitoring Ultrasound scans • Patient/Clinician intelligence • Egg Thawing • Sperm preparation • ICSI with AI sperm selection • Fertilisation and embryo culture • Extended blastocyst culture (Day 5) • Embryoscope • AI Embryo Assessment and Patient embryo viewer • Fresh embryo transfer • HFEA Fee • Pregnancy scan, or a follow up consultation for cycles which do not result in a clinical pregnancy 	£4000
	<p>Not included:</p> <ul style="list-style-type: none"> • Pre-treatment screening blood tests. • Monitoring blood tests. • Medications (£50 - £1500 per cycle) • Embryo freezing of extra embryos (£400- up to 4 straws) and storage 	Charged Separately

Cancellation and Refund policy for the Egg Thaw and Embryo Transfer package:

If there is a failure on the egg thaw stage, patient will be eligible for a partial refund, which includes fees for ICSI with AI sperm selection, extended blastocyst culture, AI Embryo Assessment and Patient embryo viewer, Fresh embryo transfer, HFEA - £1 350.

If there is a failure on fertilisation/cleavage stages, patient will be eligible for the partial refund, which includes fees for the extended blastocyst culture - £ 250.

Egg Donation Cycles

Donation Program with 6 Frozen Donor Eggs	£8610
Donation Program with 8 Frozen Donor Eggs	£ 9510

Egg Donation Cycles	Donation Program with 12 Frozen Donor Eggs	£11310
	<p>Each Egg Donation Program Includes:</p> <ul style="list-style-type: none"> • Frozen Donor Eggs • Clinical planning & support during the treatment cycle • Donation matching • Nurse consultation • Monitoring ultrasound scans for recipient • Patient/Clinician intelligence • Donor eggs thawing • Sperm preparation • ICSI with AI sperm selection • Fertilisation and embryo culture • Extended blastocyst culture (Day 5) • Embryoscope • AI Embryo Assessment and Patient embryo viewer • Fresh embryo transfer • HFEA Fee • Pregnancy scan, or a follow up consultation for cycles which do not result in a clinical pregnancy 	
	<p>Not included:</p> <ul style="list-style-type: none"> • Pre-treatment screening blood tests of egg recipient • Monitoring blood tests for egg recipient • Medications for egg recipient • Embryo freezing of extra embryos (£400- up to 4 straws) and storage 	Charged Separately

Egg Donation Program costs include costs for frozen donor eggs of Caucasian phenotype only. Alternative phenotypes including Asian / African donors have different costs POA.

All eggs have been screened for infectious diseases and quarantined for a 3-month period in accordance with HFEA guidance. ECS report available on selected donors.

We suggest using the 12- donor-eggs package because the CLBR increases progressively according to the number of oocytes consumed: 5 oocytes - 6.1%, **12 oocytes - 53.4%**.

Cancellation and Refund policy for Egg Donation Cycle package:

If there is a failure on fertilisation/cleavage stages, patient will be eligible for the partial refund, which includes fees for the extended blastocyst culture - £ 250.

If there is a failure with Donor oocytes thawing, patient will be eligible for the refund from the Donor Egg Bank.

Egg Donation Cycles

Embryo/Egg Freezing	Up to 4 straws	£400
Extra Embryo/Egg Freezing	Per each additional straw	£100
Embryo/Egg/Sperm Cryo storage	1 month	£40
	1 year	£360
Embryo/Egg Thaw	If batching of embryos, this fee is applicable for the thawing of embryos in a subsequent IVF cycle	£750
ERA test (Endometrial Receptivity Array Test)	Includes a scan but excludes medication & blood tests	£1300
Repeat ERA	If required	£1200
EMMA (Endometrial Microbiome Metagenomic Analysis) / ALICE (Analysis of Infectious Chronic Endometritis)	EMMA analyses the endometrial microbiome to identify an abnormal uterine environment. Includes a scan but excludes medication & blood tests if EMMA tests positive a second sample is required. ALICE is a test that detects pathogenic bacteria causing chronic endometritis	£1300
Repeat EMMA/ALICE	If required	£300
EndomeTRIO (ERA & EMMA/ALICE)		£1600
PGT-A up to 5 Embryos	Genetic testing to detect abnormalities with the number of chromosomes	£2750
PGT-A per embryo	Genetic testing to detect abnormalities with the number of chromosomes	£650
Endometrial scratch		£200
Sedation		£400
Hysteroscopy	Hysteroscopy (incl. sedation, excl. histology)	£2000
Sperm freeze		£200

Sperm DNA Fragmentation Analysis		£500
Semen Culture		£75
Zymot		£75

Artificial insemination (IUI) cycle

Excludes medication, approx. cost £50 to £450 1250

HFEA FEE (payable in cycles where donor sperm is used) 40

Monitoring blood tests (3 or more blood tests may be needed per treatment cycle)

Oestradiol e2 50

Luteinizing hormone LH 50

Progesterone P4 50

Multicycle Artificial insemination (iui)cycle package

3 cycles of iui 3000

Please note -multicycle iui treatments contain and exclude the same items from individual treatment cycle option

Multicycle Artificial Insemination (IUI) treatment packages must start from the beginning of the 1st cycle of the package. They cannot be joined part-way though after a previous IUI cycle attempt.

- If a cycle is abandoned prior to insemination, this will be omitted from the 3 cycle package and you will be charged separately for scans & blood tests (see cancellation & refund information), medication is non-refundable.

- There is no refund offered if the 3 cycles are unsuccessful or if a livebirth occurs after any of the 3 cycles.

- IUI multicycle packages must be paid in full before the first cycle is started and completed within 12 months.

- If you wish to convert to IVF or stop treatment, prior to the completion of the 3 cycles, you will be charged for the IUI cycles undertaken at standard price list and the remainder of the multicycle fees paid can be deducted from the IVF cycle or refunded.

Counselling (payable directly to counsellor) 80

Early pregnancy scan 225

Hycosy

Saline infusion scan

Screening Blood tests

HIV, Hepatitis B surface antigen (HBsAg) , Hepatitis B core antibody (Anti-HBc), Hepatitis C

Every patient undergoing IVF, ICSI, or IUI needs these blood tests

These tests must be within 3 months of a first treatment cycle (ie egg collection or IUI procedure) and then repeated every 2 years

Rubella

All female patients must confirm immunity to rubella

Chlamydia

All patients are tested for chlamydia

CYCLE MONITORING and IUI treatments

Cycle monitoring

Cycle monitoring costs include

clinical planning and support

monitoring ultrasound

Cycle monitoring costs does not include

Monitoring blood tests and medications if needed

CYCLE MONITORING 650

Monitoring blood tests if required

Oestradiol 50

Luteinizing hormone 50

Progesterone 50

Artificial insemination

Artificial insemination (IUI) cycle costs include

Clinical planning and support during the IUI cycle

Monitoring ultrasound scans

Sperm preparation (partner or donor) & insemination

Artificial insemination costs do not include

Pretreatment screening blood tests , monitoring blood tests and medications (charged separately)

Pregnancy scan or follow up consultation

Cancellation

If the cycle is abandoned prior to the insemination procedure , you will be eligible for a partial refund (you will be charged for scans and blood tests , medication is non refundable)

IVF Cycle

- Excludes medication - approximate cost of drugs per IVF/ICSI cycle £600 - £2500 3,995

HFEA fee (payable on every cycle where an embryo transfer takes place) 100

Monitoring blood tests (3 or more blood tests may be required per treatment cycle)

Oestradiol (E2) 50

Luteinizing Hormone (LH) 50

Progesterone (P4) 50

ICSI procedure (if required) 1,350

Extended Culture (Blastocyst)

550 Embryoscope (Time-Lapse Imaging)

- Incubation in the non-interrupted time-lapse imaging incubator is our preference for monitoring embryo development. see treatment 'add-ons' guide for more information.

500 Embryo Freezing (in addition to IVF fees, excludes cryostorage fee)

- We plan to freeze all good quality embryos following every fresh embryo transfer

- If no embryo transfer goes ahead the embryo freeze is included in the treatment cost

500 Cryostorage Options Storage of frozen eggs/sperm/embryos - monthly direct debit 30 / month

- If all the eggs, sperm or embryos are thawed the ongoing storage cost will discontinue

Multicycle IVF Packages £

IVF Multicycle (Fresh embryo transfer & freeze all) Please Note:

- Multicycle IVF treatment packages must start from the beginning of the 1st cycle of the package. They cannot be joined part-way though after a previous IVF cycle attempt.

Multicycle IVF costs include:

- Clinical

- Monitoring ultrasound scans, egg collection procedure & anaesthetic charges.

- Fresh embryo transfer or embryo freeze if no transfer goes ahead.

-

- Pregnancy scan, or a follow up consultation for cycles which do not result in a clinical pregnancy.

IVF cycle costs include:

- Clinical planning & support during the IVF treatment cycle.

- Monitoring ultrasound scans, egg collection procedure & anaesthetic charges.

- Fresh embryo transfer or embryo freeze if no transfer goes ahead (excludes cryostorage fee).

- Pregnancy scan, or a follow up consultation for cycles which do not result in a clinical pregnancy.

IVF cycle costs exclude:

- Pre-treatment screening blood tests, monitoring blood tests & medications (charged separately).

Blood test & medication costs vary per patient. Contact Aria administration to confirm costs.

Cancellation:

- If the cycle is abandoned prior to egg collection procedure, you will be eligible for a partial refund (You will be charged for scans & blood tests, medication is non-refundable – see cancellation & refund information)

IVF Cycle

- Excludes medication - approximate cost of drugs per IVF/ICSI cycle £600 - £2500 3,995

HFEA fee (payable on every cycle where an embryo transfer takes place) 100

Monitoring blood tests (3 or more blood tests may be required per treatment cycle)

Oestradiol (E2) 50

Luteinizing Hormone (LH) 50

Progesterone (P4) 50

ICSI procedure (if required) 1,350

Extended Culture (Blastocyst)

550 Embryoscope (Time-Lapse Imaging)

500 Embryo Freezing (in addition to IVF fees, excludes cryostorage fee)

- We plan to freeze all good quality embryos following every fresh embryo transfer

- If no embryo transfer goes ahead the embryo freeze is included in the treatment cost 500

Cryostorage Options Storage of frozen eggs/sperm/embryos - monthly direct debit 30 / month

- If all the eggs, sperm or embryos are thawed the ongoing storage cost will discontinue

Multicycle IVF Packages £

IVF Multicycle (Fresh embryo transfer & freeze all) Please Note:

- Multicycle IVF treatment packages must start from the beginning of the 1st cycle of the package. They cannot be joined part-way though after a previous IVF cycle attempt.

Multicycle IVF costs include:

- Clinical planning & support for each IVF treatment cycle.
- Monitoring ultrasound scans, egg collection procedure & anaesthetic charges.
- Fresh embryo transfer or embryo freeze if no transfer goes ahead.
- Pregnancy scan, or a follow up consultation for cycles which do not result in a clinical pregnancy.

Multicycle IVF costs exclude:

- Pre-treatment screening blood tests, monitoring blood tests & medications (charged separately). Blood test & medication costs vary per patient. Contact Aria administration to confirm costs.
- HFEA fee – payable on every cycle where an embryo transfer takes place.
- ICSI, extended culture (blastocyst), time-lapse imaging, and any other additional procedures (if required)
- The cryostorage fee is applicable on 1st freeze only and payable on a monthly basis as per the cryostorage fee.

Cancellation:

- If a cycle is abandoned prior to the egg collection procedure, this will be omitted from the multicycle package and you will be charged for scans & blood tests, medication is non-refundable – see cancellation & refund information.
- There is no refund offered in the event of no eggs being collected, fertilisation failure or nothing suitable for freezing.

Important:

- There is no refund offered if the cycles are unsuccessful or if a livebirth occurs after any of the cycles.
- The multicycle package is complete when all egg collections have been performed.
- All multicycle packages must be paid in full before the first cycle is started and completed within 12 months.
- If you decide to opt out of the multicycle package, you will be charged for the cycles undertaken at the standard price list fees that apply at the time of treatment and refunded the remaining difference.

2 Cycles of IVF

- Excludes medication - approximate cost of drugs per IVF cycle £600 - £2500 7,050

Egg Freezing £

Egg Freezing Cycle

Egg Freezing cycle cost includes:

- Clinical planning & support during the Egg Freezing treatment cycle.
- Monitoring ultrasound scans, egg collection procedure & anaesthetic charges.
- Egg Freezing (excludes cryostorage fee).
- Follow up consultation.

Egg Freezing cycle cost exclude:

- Pre-treatment screening blood tests, monitoring blood tests & medications (charged separately).
Blood test & medication costs vary per patient. Contact Aria administration to confirm costs.

Cancellation:

- If the cycle is abandoned prior to egg collection procedure, you will be eligible for a partial refund. (You will be charged for scans & blood tests, medication is non-refundable – see cancellation & refund information)

Egg Freeze Cycle

- Excludes medication - approximate cost of drugs per Egg Freezing cycle £600 - £2500
- Excludes cryostorage fee 3,295

Monitoring blood tests (3 or more blood tests may be required per treatment cycle)

Oestradiol (E2) 50

Luteinizing Hormone (LH) 50

Progesterone (P4) 50

Cryostorage Options Storage of frozen eggs/sperm/embryos (monthly direct debit) 30 / month

- If all the eggs, sperm or embryos are thawed the ongoing storage cost will discontinue.

Egg Thaw and Embryo Transfer

Egg Thaw and Embryo Transfer cycle cost includes:

- Clinical planning & support during the egg thaw treatment cycle.
- Monitoring ultrasound scans & monitoring blood tests.
- Thawing of eggs, ICSI and transfer of embryos, or embryo freeze if no transfer goes ahead.
- Assisted hatching of embryos created from frozen/thawed eggs.
- Pregnancy scan, or a follow up consultation for cycles which do not result in a clinical pregnancy.

Egg Thaw and Embryo Transfer cycle cost excludes:

- Pre-treatment screening blood tests, monitoring blood tests & medications (charged separately). Blood test & medication costs vary per patient. Contact Aria administration to confirm costs.

Egg thaw, ICSI & Embryo Transfer Cycle

- Excludes medication - approximate cost of drugs per Egg Thaw cycle £0 - £500 3,950

HFEA fee (payable on every cycle where an embryo transfer takes place) 100

3 Cycles of IVF

- Excludes medication - approximate cost of drugs per IVF cycle £600 - £2500 9,1

Consultations & Pre-Treatment Investigations £

Consultations Consultation 250

Counselling (payable directly to the counsellor) 80

Nurse Consultation No Charge

Investigations Ultrasound scan – 2D pelvic scan including antral follicle count 225

Early pregnancy scan 225

Anti-Mullerian Hormone (AMH) - ovarian reserve blood test 120

Semen Analysis 165

Comprehensive Male Fertility Assessment •

Semen Analysis, DNA Fragmentation, Semen Culture & Hyaluronan-Binding Assay (HBA) 650

HyCosy – test of tubal patency 550

Saline Infusion Hysterosonogram (3D scan) - saline contrast scan of uterine cavity 400

Screening Blood Tests HIV, Hepatitis B surface antigen (HBsAg), Hepatitis B core antibody (Anti-HBc), Hepatitis C

- Every patient undergoing IVF, ICSI or IUI treatments require these blood tests.
- These tests must be with within 3 months of a first treatment cycle (i.e. egg collection or IUI procedure) and then repeated every 2 years for subsequent cycles. 180 (per partner)

Rubella

- All patients must be tested to ensure immunity to rubella before treatment. If you are pregnant and catch rubella, it can cause serious damage to the unborn child. 65

asChlamydia

- All patients are tested for Chlamydia to allow our doctors to treat any infection, prevent further spread and assess any damage which may have been caused to their fertility. 95 (per partner)
- INFAD01 Aria Price List v18 Page 4 of 18 Cycle Monitoring & IUI Treatments £ Cycle Monitoring Cycle monitoring costs include:

- Clinical planning & support.
- Monitoring ultrasound scans. Cycle monitoring costs exclude:
- Monitoring blood tests & medications (if required).

Cycle Monitoring 650

Monitoring blood tests (if required) Oestradiol (E2) 50

Luteinizing Hormone (LH) 50 Progesterone (P4) 50 Artificial Insemination (IUI) Artificial Insemination (IUI) cycle costs include:

- Clinical planning & support during the IUI treatment cycle.
- Monitoring ultrasound scans. • Sperm Preparation (partner or donor) & insemination. Artificial Insemination (IUI) cycle costs exclude:
- Pre-treatment screening blood tests, monitoring blood tests & medications (charged separately).
- Pregnancy scan or follow-up consultation. Cancellation:

- If the cycle is abandoned prior to the insemination procedure, you will be eligible for a partial refund (You will be charged for scans & blood tests, medication is non-refundable – see cancellation & refund information). Artificial Insemination (IUI) Cycle

- Excludes medication - approximate cost of drugs per stimulated IUI cycle £50 - £450 1,250 HFEA fee (payable in cycles in which donor sperm is used) 40 Monitoring blood tests (3 or more blood tests may be required per treatment cycle) Oestradiol (E2) 50 Luteinizing Hormone (LH) 50 Progesterone (P4) 50 Multicycle Artificial Insemination (IUI) Cycle Package 3 Cycles of Artificial Insemination (IUI) 3,000 Please Note – multicycle IUI treatments contain and exclude the same items from individual treatment cycle option.

- Multicycle Artificial Insemination (IUI) treatment packages must start from the beginning of the 1st cycle of the package. They cannot be joined part-way though after a previous IUI cycle attempt.

- If a cycle is abandoned prior to insemination, this will be omitted from the 3 cycle package and you will be charged separately for scans & blood tests (see cancellation & refund information), medication is non-refundable.

- There is no refund offered if the 3 cycles are unsuccessful or if a livebirth occurs after any of the 3 cycles.

- IUI multicycle packages must be paid in full before the first cycle is started and completed within 12 months.

- If you wish to convert to IVF or stop treatment, prior to the completion of the 3 cycles, you will be charged for the IUI cycles undertaken at standard price list and the remainder of the multicycle fees paid can be deducted from the IVF cycle or refunded. INFAD01 Aria Price List v18 Page 5 of 18 IVF & ICSI Treatment Cycles £ IVF Cycle IVF cycle costs include:

- Clinical planning & support during the IVF treatment cycle.

- Monitoring ultrasound scans, egg collection procedure & anaesthetic charges.

- Fresh embryo transfer or embryo freeze if no transfer goes ahead (excludes cryostorage fee).

- Pregnancy scan, or a follow up consultation for cycles which do not result in a clinical pregnancy. IVF cycle costs exclude:

- Pre-treatment screening blood tests, monitoring blood tests & medications (charged separately). Blood test & medication costs vary per patient. Contact Aria administration to confirm costs.

Cancellation:

- If the cycle is abandoned prior to egg collection procedure, you will be eligible for a partial refund (You will be charged for scans & blood tests, medication is non-refundable – see cancellation & refund information) IVF Cycle

- Excludes medication - approximate cost of drugs per IVF/ICSI cycle £600 - £2500 3,995 HFEA fee (payable on every cycle where an embryo transfer takes place) 100 Monitoring blood tests (3 or more blood tests may be required per treatment cycle) Oestradiol (E2) 50 Luteinizing Hormone (LH) 50 Progesterone (P4) 50 ICSI procedure (if required) 1,350 Extended Culture (Blastocyst)

- We routinely plan to culture all embryos to day 5. This fee is charged in addition to the IVF cycle cost, but will be refunded if culture beyond day 3 does not take place. 550 Embryoscope (Time-Lapse Imaging)

Incubation in the non-interrupted time-lapse imaging incubator is our preference for monitoring embryo development. Please see treatment 'add-ons' guide for more information. 500 Embryo Freezing (in addition to IVF fees, excludes cryostorage fee)

- We plan to freeze all good quality embryos following every fresh embryo transfer
- If no embryo transfer goes ahead the embryo freeze is included in the treatment cost 500
Cryostorage Options Storage of frozen eggs/sperm/embryos - monthly direct debit 30 / month
- If all the eggs, sperm or embryos are thawed the ongoing storage cost will discontinue. INFAD01 Aria Price List v18 Page 6 of 18 Multicycle IVF Packages £ IVF Multicycle (Fresh embryo transfer & freeze all) Please Note:
 - Multicycle IVF treatment packages must start from the beginning of the 1st cycle of the package. They cannot be joined part-way though after a previous IVF cycle attempt. Multicycle IVF costs include:
 - Clinical planning & support for each IVF treatment cycle.
 - Monitoring ultrasound scans, egg collection procedure & anaesthetic charges.
 - Fresh embryo transfer or embryo freeze if no transfer goes ahead.
 - Pregnancy scan, or a follow up consultation for cycles which do not result in a clinical pregnancy.
 - Multicycle IVF costs exclude:
 - Pre-treatment screening blood tests, monitoring blood tests & medications (charged separately). Blood test & medication costs vary per patient. Contact Aria administration to confirm costs.
 - HFEA fee – payable on every cycle where an embryo transfer takes place.
 - ICSI, extended culture (blastocyst), time-lapse imaging, and any other additional procedures (if required)
 - The cryostorage fee is applicable on 1st freeze only and payable on a monthly basis as per the cryostorage fee. Cancellation:
 - If a cycle is abandoned prior to the egg collection procedure, this will be omitted from the multicycle package and you will be charged for scans & blood tests, medication is non-refundable – see cancellation & refund information.
 - There is no refund offered in the event of no eggs being collected, fertilisation failure or nothing suitable for freezing. Important:
 - There is no refund offered if the cycles are unsuccessful or if a livebirth occurs after any of the cycles.
 - The multicycle package is complete when all egg collections have been performed.
 - All multicycle packages must be paid in full before the first cycle is started and completed within 12 months.
 - If you decide to opt out of the multicycle package, you will be charged for the cycles undertaken at the standard price list fees that apply at the time of treatment and refunded the remaining difference. 2 Cycles of IVF
 - Excludes medication - approximate cost of drugs per IVF cycle £600 - £2500 7,050 3 Cycles of IVF

• Excludes medication - approximate cost of drugs per IVF cycle £600 - £2500 9,100 INFAD01 Aria Price List v18 Page 7 of 18 Egg Freezing £ Egg Freezing Cycle Egg Freezing cycle cost includes:

- Clinical planning & support during the Egg Freezing treatment cycle.
 - Monitoring ultrasound scans, egg collection procedure & anaesthetic charges.
 - Egg Freezing (excludes cryostorage fee).
 - Follow up consultation. Egg Freezing cycle cost exclude:
 - Pre-treatment screening blood tests, monitoring blood tests & medications (charged separately). Blood test & medication costs vary per patient. Contact Aria administration to confirm costs.
- Cancellation:

• If the cycle is abandoned prior to egg collection procedure, you will be eligible for a partial refund. (You will be charged for scans & blood tests, medication is non-refundable – see cancellation & refund information) Egg Freeze Cycle

- Excludes medication - approximate cost of drugs per Egg Freezing cycle £600 - £2500
- Excludes cryostorage fee 3,295 Monitoring blood tests (3 or more blood tests may be required per treatment cycle) Oestradiol (E2) 50 Luteinizing Hormone (LH) 50 Progesterone (P4) 50 Cryostorage Options Storage of frozen eggs/sperm/embryos (monthly direct debit) 30 / month

• If all the eggs, sperm or embryos are thawed the ongoing storage cost will discontinue. Egg Thaw and Embryo Transfer Egg Thaw and Embryo Transfer cycle cost includes:

- Clinical planning & support during the egg thaw treatment cycle.
- Monitoring ultrasound scans & monitoring blood tests.
- Thawing of eggs, ICSI and transfer of embryos, or embryo freeze if no transfer goes ahead.
- Assisted hatching of embryos created from frozen/thawed eggs.
- Pregnancy scan, or a follow up consultation for cycles which do not result in a clinical pregnancy. Egg Thaw and Embryo Transfer cycle cost excludes:

• Pre-treatment screening blood tests, monitoring blood tests & medications (charged separately). Blood test & medication costs vary per patient. Contact Aria administration to confirm costs. Egg thaw, ICSI & Embryo Transfer Cycle

• Excludes medication - approximate cost of drugs per Egg Thaw cycle £0 - £500 3,950 HFEA fee (payable on every cycle where an embryo transfer takes place) 100 INFAD01 Aria Price List v18 Page 8 of 18 Multicycle Egg Freezing Packages £ Multicycle Egg Freezing Please Note:

- Multicycle Egg Freezing treatment packages must start from the beginning of the 1st cycle of the package. They cannot be joined part-way though after a previous egg freezing attempt. Multicycle Egg Freezing costs include:
 - Clinical planning & support for each egg freezing cycle.
- Monitoring ultrasound scans, egg collection procedure & anaesthetic charges.
- Egg Freezing. • Follow up consultation. Multicycle IVF costs exclude:
 - Pre-treatment screening blood tests, monitoring blood tests & medications (charged separately). Blood test & medication costs vary per patient. Contact Aria administration to confirm costs.

- The cryostorage fee is applicable on 1st freeze only and payable on a monthly basis as per the cryostorage fee. Cancellation:
 - If a cycle is abandoned prior to the egg collection procedure, this will be omitted from the multicycle package and you will be charged for scans & blood tests, medication is non-refundable – see cancellation & refund information.
 - There is no refund offered in the event of no eggs being collected or the eggs collected are not suitable for freezing. Important:
 - There is no refund offered if the cycles are unsuccessful or if a livebirth occurs after any of the cycles.
 - The multicycle package is complete when all egg collections have been performed.
 - All multicycle packages must be paid in full before the first cycle is started and completed within 12 months.
 - If you decide to opt out of the multicycle package, you will be charged for the cycles undertaken at the standard price list fees that apply at the time of treatment and refunded the remaining difference. 2 Cycles of Egg Freezing
 - Excludes medication - approximate cost of drugs per IVF/ICSI cycle £600 - £2500
 - Excludes cryostorage fee 5,700 3 Cycles of Egg Freezing
 - Excludes medication - approximate cost of drugs per IVF/ICSI cycle £600 - £2500
 - Excludes cryostorage fee 7,900 INFAD01 Aria Price List v18 Page 9 of 18 Frozen Embryo Transfer, Thaw Cycles & Freezing £ Frozen Embryo Transfer Frozen Embryo Transfer cycle cost includes:
 - Clinical planning & support during the frozen embryo transfer treatment cycle.
 - Monitoring ultrasound scans.
 - Thaw, assisted hatching (if not previously performed) & embryo transfer.
 - Pregnancy scan, or a follow up consultation for cycles which do not result in a clinical pregnancy.
 - Frozen Embryo Transfer cycle cost excludes:
 - Pre-treatment screening blood tests, monitoring blood tests & medications (charged separately). Blood test & medication costs vary per patient. Contact Aria administration to confirm costs. Frozen embryo transfer (FET)
 - Excludes medication - approximate cost of drugs per FET cycle £0 - £500 2,150 HFEA fee (payable on every cycle where an embryo transfer takes place) 100 Egg Thaw and Embryo Transfer Egg Thaw and Embryo Transfer cycle cost includes:
 - Clinical planning & support during the egg thaw treatment cycle.
 - Monitoring ultrasound scans.
 - Thawing of eggs, ICSI, assisted hatching and embryo transfer, or embryo freeze if no transfer goes ahead.
 - Pregnancy scan, or a follow up consultation for cycles which do not result in a clinical pregnancy.
 - Egg Thaw and Embryo Transfer cycle cost excludes:

- Pre-treatment screening blood tests, monitoring blood tests & medications (charged separately). Blood test & medication costs vary per patient. Contact Aria administration to confirm costs. Egg thaw, ICSI & Embryo Transfer Cycle
- Excludes medication - approximate cost of drugs per Egg Thaw cycle £0 - £500 3,950 HFEA fee (payable on every cycle where an embryo transfer takes place) 100 Egg or Embryo Thaw within a fresh treatment cycle Egg or embryo thaw within an IVF/ICSI cycle or egg donor recipient cycle.
- If batching of embryos, this fee is applicable for the thawing of embryos in a subsequent IVF cycle, e.g. PGT-A 500 Freezing Costs Embryo freezing (excluding storage) 500 Sperm freezing (excluding storage) 325 Single sperm vitrification – surgically recovered sperm (excluding storage) 800 Cryostorage Options Storage of frozen eggs/sperm/embryos (monthly direct debit) 30 / month
- If all the eggs, sperm or embryos are thawed the ongoing storage cost will discontinue. INFAD01 Aria Price List v18 Page 10 of 18 Donation Treatment Cycles (Egg & Sperm Donation) £ Egg Donation Recipient (including known & self-recruited donors) Egg donation cycle costs include:
 - Clinical planning & support during the egg donation treatment cycle for both donor and recipient. • Cycle monitoring ultrasound scans for egg donor and recipient.
 - Egg donor monitoring blood tests, medications & donation compensation.
 - Egg collection procedure & anaesthetic charges for egg donor.
 - Fresh embryo transfer for recipient or embryo freeze if no transfer goes ahead (excludes cryostorage fee). • Pregnancy scan for the recipient is included, or a follow-up consultation for egg donation cycles which do not result in a clinical pregnancy. Egg donation cycle costs exclude:
 - Donor consultation & investigations (required for each known or self-recruited donor).
 - Pre-treatment donor screening blood tests (required for either 1 st donation cycle or subsequent donation cycle)
 - Pre-treatment screening blood tests, monitoring blood tests & medications for egg recipients (charged separately). Blood test & medication costs vary per patient. Contact Aria administration to confirm costs. Cancellation:
 - If the egg donors cycle is abandoned prior to egg collection procedure, you will be eligible for a partial refund (see cancellation & refund information) Egg Donor Consultation & Investigations (consultation, ultrasound, AMH) 595 Egg Donor Screening (pre-treatment 1 st cycle)
 - Mandatory screening required for donation of eggs 1,840 Egg Donor Screening (pre-treatment subsequent cycle)
 - Mandatory repeat screening required for donation of eggs 830 Egg Donation IVF Cycle (embryo transfer for recipient)
 - Excludes recipient medication - approximate cost of drugs per donation cycle £150 - £600. 7,460 Egg Donation freeze all IVF Cycle (freeze all cycle)
 - Includes embryo freezing (excludes cryostorage fee).
 - Includes 1st Frozen Embryo Transfer (FET) • Excludes recipient medication - approximate cost of drugs per donation cycle £150 - £600. 8,460 Egg Donation Cycle Additional Costs HFEA fee (payable on every cycle where an embryo transfer takes place) 100 Monitoring blood tests (3 or more blood

tests may be required per treatment cycle) Oestradiol (E2) 50 Luteinizing Hormone (LH) 50 Progesterone (P4) 50 ICSI procedure (if required) 1,350 Extended Culture (Blastocyst)

- We routinely plan to culture all embryos to day 5. This fee is charged in addition to the IVF cycle cost, but will be refunded if culture beyond day 3 does not take place. 550 Embryoscope (Time-Lapse Imaging)

- Incubation in the non-interrupted time-lapse imaging incubator is our preference for monitoring embryo development. Please see treatment 'add-ons' guide for more information. 500 INFAD01 Aria Price List v18 Page 11 of 18 Embryo Freezing (in addition to IVF fees, excludes cryostorage fee) 500 Cryostorage Options Storage of frozen eggs/sperm/embryos (monthly direct debit) 30 / month

- If all the eggs, sperm or embryos are thawed the ongoing storage cost will discontinue. Sperm Donation Donor sperm (personal purchase of samples from donor bank) POA with donor bank Personal import of donor sperm (excludes cryostorage fee) 250 Cryostorage Options Storage of frozen eggs/sperm/embryos (monthly direct debit) 30 / month

- If all the eggs, sperm or embryos are thawed the ongoing storage cost will discontinue. INFAD01 Aria Price List v18 Page 12 of 18 Shared Motherhood (Same Sex Female Partners) £ Shared motherhood (intra-partner donation) Egg donation with shared motherhood is an egg donation cycle for same sex parents whereby one wishes to donate her eggs to her partner in an attempt to conceive. IVF with intra-partner donation cycle costs include:

- Clinical planning & support during the donation cycle for both egg provider & recipient.

- Cycle monitoring ultrasound scans for egg provider.

- Egg collection procedure & anaesthetic charges for egg provider.

- Fresh embryo transfer or embryo freeze if no transfer goes ahead (excludes cryostorage fee).

- Pregnancy scan, or a follow up consultation for cycles which do not result in a clinical pregnancy. IVF with intra-partner donation cycle costs exclude:

- Egg provider & recipient screening blood tests, monitoring blood tests & medications (charged separately).

- Additional screening tests for egg provider, if a synchronised embryo transfer is taking place with recipient partner. Blood test & medication costs vary per patient. Contact Aria administration to confirm costs. Cancellation:

- If the egg providers cycle is abandoned prior to egg collection procedure, you will be eligible for a partial refund. (You will be charged for scans & blood tests, medication is non-refundable – see cancellation & refund information) IVF with intra-partner egg donation (embryo transfer for recipient partner)

- Excludes egg provider stimulation medication – approximate cost of drugs per cycle £600 - £2500 • Excludes egg recipient medication – approximate cost of drugs per cycle £150 - £600 5,050 HFEA fee (payable on every cycle where an embryo transfer takes place) 100 IVF with intra-partner egg donation (embryo freeze – no embryo transfer to recipient partner)

- Includes embryo freezing (excludes cryostorage fee).

- Excludes egg provider stimulation medication - approximate cost of drugs per cycle £600 - £2500
4,450 Monitoring blood tests (3 or more blood tests may be required per treatment cycle) Oestradiol (E2) 50 Luteinizing Hormone (LH) 50 Progesterone (P4) 50 ICSI procedure (if required) 1,350
Extended Culture (Blastocyst)

- We routinely plan to culture all embryos to day 5. This fee is charged in addition to the IVF cycle cost, but will be refunded if culture beyond day 3 does not take place. 550 Embryoscope (Time-Lapse Imaging)

- Incubation in the non-interrupted time-lapse imaging incubator is our preference for monitoring embryo development. Please see treatment 'add-ons' guide for more information. 500 Embryo Freezing (in addition to IVF fees, excludes cryostorage fee)

- We plan to freeze all good quality remaining embryos following every fresh embryo transfer

- If no embryo transfer goes ahead the embryo freeze is included in the treatment cost 500
Cryostorage Options Storage of frozen eggs/sperm/embryos (monthly direct debit) 30 / month

- If all the eggs, sperm or embryos are thawed the ongoing storage cost will discontinue. INFAD01
Aria Price List v18 Page 13 of 18 Surrogacy £ Intended Parents Embryo Creation – Own Eggs IVF Cycle
Intended Parents (Own Eggs) costs include:

- Clinical planning & support during the treatment cycle

- Monitoring ultrasound scans, egg collection procedure & anaesthetic charges.

- Freezing of embryos (excludes cryostorage fee).

- Follow up consultation. IVF Cycle Intended Parents (Own Eggs) costs exclude:

- Pre-treatment screening blood tests, monitoring blood tests & medications (charged separately).
Blood test & medication costs vary per patient. Contact Aria administration to confirm costs.

Cancellation:

- If the cycle is abandoned prior to egg collection procedure, you will be eligible for a partial refund (You will be charged for scans & blood tests, medication is non-refundable – see cancellation & refund information) Intended Parent Embryo Creation – own eggs (1st cycle) Intended Parent Screening (1st cycle)

- Mandatory screening required for donation of gametes/embryos to a surrogate host 2,670 (per partner) IVF Cycle Surrogacy (Own Eggs) – 1 st cycle

- Excludes medication - approximate cost of drugs of drugs per IVF/ICSI cycle £600 - £2500 6,110
